- Deburring Tools
- Bits
- Tungsten Electrodes
- Purge Plug kits
- Oxygen analyzers
- Saw Blades
- Saw Vises
- Saw Blocks

# SERVICES

We are more than a vendor. Our industry knowledge and expertise allow us to provide you both products and service solutions.

## REPAIR CENTER

Our full-time service technicians are factory certified and trained to repair your equipment back to factory specifications. We can accurately diagnose and repair your equipment in a timely manner. We have the knowledge and resources to help you evaluate your specialty application and determine the necessary components. MIT commits to provide you with quality products and exceptional service.

## RENTAL

MIT maintains a wide selection of welding equipment for rent including facing tools, weld heads, power supplies, milling motors and related components. Each tool is carefully inspected, calibrated and tested before it goes out. We stock:

- Orbital Welding Systems
- Orbital Saws
- Facing Tools
- Beveling Tools

## TRAINING & SUPPORT

Morgan Industrial Technology training sessions ensure confidence in your equipment and your ability to operate it. Off-site or in our weld lab, MIT offers an organized, accommodating, and comfortable environment built for constructive learning.

Should you need assistance, MIT is often able to provide telephone support for purchased and rented equipment. Telephone support includes:

- Pre-sales specifications
- Installation strategies and performance
- Troubleshooting of equipment

Morgan Industrial Technology was established in 2005 with the simple mission of being a single-source provider for customers needing orbital welding and cutting equipment for tube and pipe applications. At Morgan Industrial Technology, we believe conversation is essential to providing the best possible service and solutions, which we strive to do every day, for every customer. Our high standards and unparalleled service make us the only orbital welding and cutting specialist with the equipment and technical expertise to solve your unique challenges.

We know we aren't your only choice, but we believe we are your best choice for equipment, rental, training, repairs and ongoing service.
