

CUTTING BLOCKS

Pro Series

Cutting Blocks are a simple mechanism used to guide Recipro Saws through stainless steel tube for a square cut.

They also securely clamp the pipe which stops deformation.

FEATURES

- **Square Cut** - every time
- **Parts** - are precision machine and hardened
- **Clearance Groove** - for clamping over existing welds
- **Offset Slot** - on smaller sizes for cutting close to elbows and fittings
- **Performance** - incredible accuracy
- **Locking arms** - on all sizes
- **Built in Clamps** - large knurled handle allows high clamping pressure
- **Sizes** - are available individually
- **Sets** - come in a Tano Systainer case with a form inlay.
- **Quality** - Australian made

For use with Recipro Saws
